

ADAPTIVE DESIGN ASSOCIATION

LOOKING FOR CORPORATE VOLUNTEER GROUPS

Customize a hands-on, team building experience. Learn about accessibility and community needs. Contribute to a truly worthwhile cause.

**EMAIL INFO@ADAPTIVEDESIGN.ORG TO
SCHEDULE YOUR PROGRAM TODAY.**

Make a difference by joining us in the workshop. It's also a fun way to bond with your colleagues!

ABOUT ADAPTIVE DESIGN

Now in its 22nd year!

The Adaptive Design Association builds custom adaptive equipment for children with disabilities, using readily available, affordable materials like cardboard and white glue. Your contribution will ensure more children with disabilities receive the custom equipment they need to lead healthy lives and meet their full potential. Last year alone we used 200 sheets of triple-wall cardboard, 20 gallons of white glue, and 10 cases of hot glue to build over 400 adaptive pieces.

WHAT YOU'LL DO

Customize your experience!

Beginning with a guided tour, of our studio you will see, touch, and try unique, fun solutions for improving accessibility. Our experts will then lead a hands-on workshop, teaching you how to build. You will learn basic cardboard carpentry techniques and/or switches and circuitry. No experience is necessary. You will leave with a deeper understanding of how affordable materials, simple tools, and your own creativity can generate solutions that make a difference.

In paying to volunteer, your team not only has a shared immersive hands-on experience in fabrication and adaptive design, but your financial contribution also addresses a critical community need. It allows individuals and families in NYC to gain access to custom equipment that fosters full participation in their communities. Programs start at \$2,500. We can work with you to help shape a memorable and invaluable 2-3 hour experience.

For more information about our program, please call 212-904-1200. You may also email us at info@adaptivedesign.org
